Below is an image of my dining room table (English, 2025). On the table, there is:

- A blue tablecloth
- One wine bottle with two goblets,
- One bowl of fruit,
- One silver plate with meat and cheese, and
- two candles

While there are probably more than 4 types of shapes in this image, the main four that I will be using are:

- At least 10 Boxes/Cubes, which are needed to recreate the meat and cheese on the plate,
- 4 Cylinders; 2 to recreate the wine bottle's Bordeaux shape and 2 for the candles,
- 2 Planes, one for the table and one for the silver plate, and
- At least 10 Spheres, which are needed to recreate both the bowl and the fruit in the bowl.

I chose these shapes because I want to have a wide variety of objects in order to help create a compelling scene. My chosen shapes can easily be given custom sizes, textures, and colors to meet these needs. Additionally, this list of shapes that will be used is not an exhaustive one; I will likely use more shapes to recreate the objects surrounding the table. For example, I could use cylinders to recreate the orange jacket hanging on the wall.
