Below is an image of the hedge maze (SNHU, 2025). The four main shapes that could be used to recreate this image are:

1. At least 8 Cones
2. At least 1 Prism
3. At least 1 Torus
4. At least 4 Rectangles

One could use more of less of these shapes to simplify 3D replication and make image recreation more efficient overall. Additionally, one could use other shapes to recreate the plants in the image, such as a tapered cylinder to recreate the centerpiece of the hedge maze and spheres to recreate the trees in the background.
